

Each Living Lander engages in one or more of the these actions on the landscape:

- 1 Landscape Mobilisation** - To ensure that decisions for the landscape are co-created with the people affected on the ground and a collective awareness of current challenges, aspirations and opportunities is built.
- 2 Landscape Facilitation** - To create an environment for change by working with landscape stakeholders, the public and private sector as well as downstream water users to address the various challenges facing the socio-ecological landscape.
- 3 Landscape Innovation** - To get involved in the day to day work on-site, working closely with landowners and communities.
- 4 Knowledge Brokering** - To inform action by improving the knowledge base for specific innovations through working with universities and other institutions of research.
- 5 Business Development** - To develop 4 Returns Business cases, enabling long-term financial and ecological sustainability.
